"Cloning and nucleotide sequence analysis of pepV, a carnosinase ger
from Lactobacillus delbrueckii susp. lactis DSM 7290, and partial
characterization of the enzyme.";

Microbiology 140:2591-2600(1994).

-! FUNCTION: HAS ACTIVITY AGAINST BETA-ALANYL-DIPEPTIDES INCLUDING
-CARNOSINE (BETA-ALANYL-HISTIDINE).

-! CARLYTIC ACTIVITY: Hydrolysis of Xaa-|-His dipeptides.
-! SUBCELLULAR LOCATION: Cytoplasmic (Probable).
-! SUBCELLULAR LOCATION: Cytoplasmic (Probable).
                                                                                                                                                                                                                                                  No.:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                P45494;
